# Valve Station ICF 15, 20, 25

Based on advanced technology the ICF valve station incorporates several functions in one housing, which can replace a series of conventional mechanical, electro-mechanical and electronically operated valves.

This valve station not only provides a number of advantages in the design phase of a refrigeration plant but also in the installation, service and maintenance.

The ICF valve stations are designed for low and high pressure refrigerants and can be used in pumped liquid lines, liquid injection lines and hot gas lines.

Supplied as a complete assembly, it is fully tested at high pressure and its functions are tested under factory controlled conditions.

One code number equals one application solution.

## Features

- Designed for industrial refrigeration applications for a maximum working pressure of 52 bar/754 psig.
- Applicable to HCFC, non flammable HFC, R717 (Ammonia) and R744 (CO<sub>2</sub>). The use of ICF valve stations with flammable hydrocarbons is not recommended.
- Direct weld connections (No leaks through flanges)
- Connection types include butt weld and socket weld.
- Low temperature steel housing.
- Low weight and compact design.
- V-port regulating cones on the control modules ensure optimum regulating accuracy particularly at part load.
- *Modular Concept*  
Each housing is available with several different connection types and sizes. Valve service is performed by replacing the function module.
- Side ports for the connection of pressure gauges, transmitters, sight glasses, service valve etc.
- UL approved

## Valve station, ICF

### Technical data

- **Refrigerants**  
Applicable to HCFC, non flammable HFC, R717 (Ammonia) and R744 (CO<sub>2</sub>).  
The use of ICF valve stations with flammable hydrocarbons is not recommended.  
For further information please contact the local Danfoss sales company.
  - **Temperature range**  
–60/+120°C (–76/+248°F).  
If the ICM module is going to be used in liquid refrigerant with a temperature above +75°C (+167°F), please contact Danfoss.
  - **Ambient temperature for ICF with ICAD:**  
–30°C/+50°C (–22°F/122°F)
  - **Surface protection**  
The external surface is zinc-TLP treated to provide corrosion protection according to EN ISO 2081:2009  
Additional on-site corrosion protection is recommended.
  - **Pressure**  
The ICF is designed for:  
Max. working pressure: 52 bar g (754 psig)
- Opening differential pressure:*  
Please refer to the individual function module data.

### Design

The main components of the ICF valve station are:

- A housing
- A maximum of four or six function modules  
(In all ICF 15 the 2 first modules (M1 and M2) are predefined as stop valve and filter module.)

### Housing

### Function modules

**Each housing accommodates a maximum of four or six function modules, of the following types (ICF 15 has 2 fixed modules and 2 free):**

- Stop valve module
- Manual regulating valve module
- Filter module
- Solenoid valve module
- Electronic expansion valve module
- Manual opening module
- Check valve module
- Stop/check valve module
- Motor valve module
- External welding connection module
- Blank top cover

### Optional:

The housings are supplied with a predefined number of side ports for the following options:

- Sight glass
- Temperature or pressure sensor
- Pressure gauge
- Side exit for drain or bypass.

The design allows maximum capacity and minimum pressure drop, using advanced technology and double seats – offering higher capacity than conventional systems using individual valves and components.

The ICF valve station is multifunctional.

ICF valve station offers compact dimensions and shortened installation time due to the reduced number of direct welded connections.

Supplied as a complete assembly, it is leak tested at high pressure and its functions are tested under factory controlled conditions.

### Connections

There is a wide range of connection types and sizes available with ICF valve stations:

- D: Butt weld, DIN (EN 10220)
- A: Butt weld, ANSI (B 36.10)
- SOC: Socket weld, ANSI (B 16.11)  
15 to 40 mm (½ in. to 1½ in.)

### Approvals

The ICF concept is designed to fulfil global refrigeration requirements.  
For specific approval information, please contact Danfoss.

### Housing and function module material

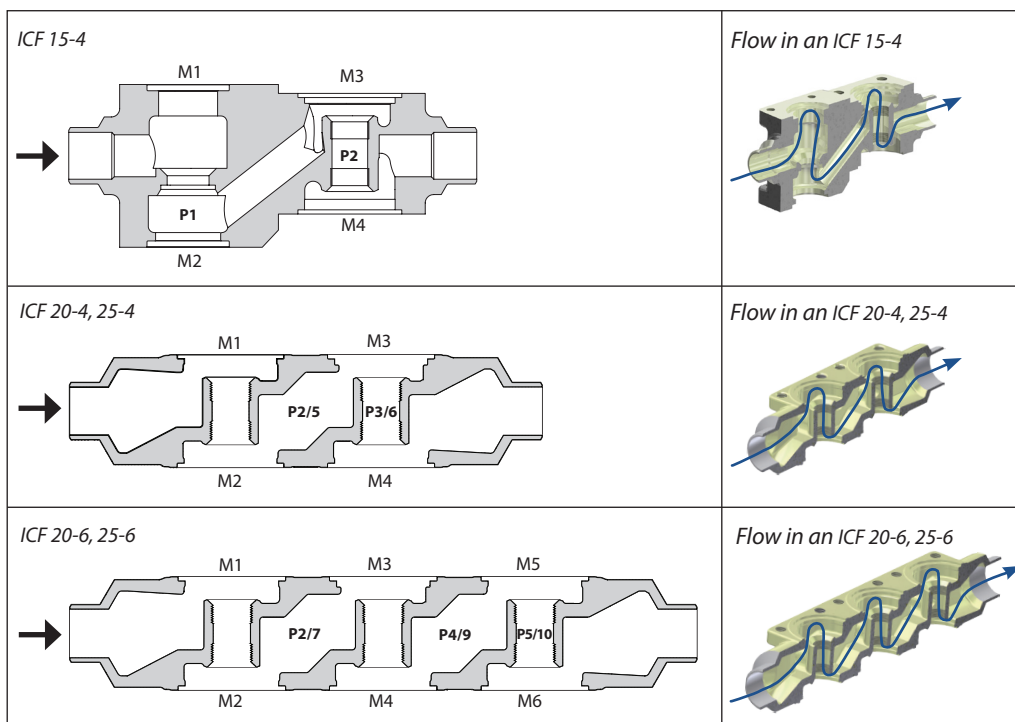

Low temperature steel

**When using TIG/MIG/SAW welding technology, it is possible to install the ICF valve station without prior removal of the function modules from the housing. If using other welding methods the modules must be removed during welding.**

Please consult the product instruction for more details.

## ICF 15 and 20

### Description of the function modules for ICF 15 and 20

ICF 15 and ICF 20 have the same function modules except for the two fixed modules M1 (stop valve ICFS 15) and M2 (filter ICFF 15) in ICF 15.

<p><b>ICFS 15/20</b> <i>Stop valve module</i> This module has the function of a stop valve, and has a red cap.</p> <p><b>ICFR 20A</b> <i>Manual regulating valve module</i> This module has the function of a hand regulating valve, and has a yellow cap.</p>	 <p>ICFS 15/20 / ICFR 20A</p>	<p><b>ICFC 20</b> <i>Check valve module</i> This module has the function of a check valve.</p>	 <p>ICFC 20</p>

**Please note:**

At about 10% of maximum mass flow of ICFE 20H, the pressure differential correspond to about 0.07 Bar (1 psi). ICFE 20H will start to open at these conditions. At a pressure differential of minimum 0.2 Bar (2.9 psi) ICFE 20H will be 100 % open.

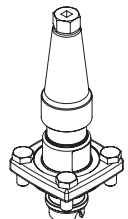

Description of the function modules for ICF 25

**ICFS 25**  
*Stop valve module*  
 This module has the function of a stop valve, and has a red cap.

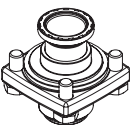

ICFS 25

**ICFR 25, A or B**  
*Manual regulating valve module*  
 This module has the function of a hand regulating valve, and has a yellow cap.

ICFR 25

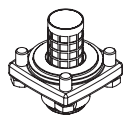

**ICFC 25**  
*Check valve module*  
 This module has the function of a check valve.

ICFC 25

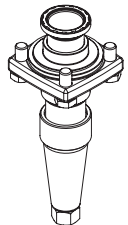

**ICFF 25 / ICFF 25E**  
*Filter module*  
 This module functions as a filter.

Filter size:  
 ICF with DIN and ANSI (ICFF 25) connections: Pleated 150 $\mu$  (100 mesh) / 160 cm<sup>2</sup> (24.8 in<sup>2</sup>)  
 ICF with SOC connections (ICF 25E): Pleated 250 $\mu$  (72 mesh) / 330 cm<sup>2</sup> (51.2 in<sup>2</sup>)

ICFF 25 / ICFF 25E

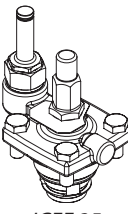

**ICFN 25**  
*Stop/check valve module*  
 This module has the function of a combined stop and check valve, and has a red cap.

ICFN 25

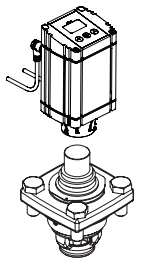

**ICFE 25**  
*Solenoid valve module*  
 This module has the function of a normally closed solenoid valve for controlling the refrigerant flow.

It has a built-in manual opening function.

ICFE 25

**ICM 25-A or B**  
*Motor valve module*  
 This module is a stepper motor actuator valve for on/off and modulating control of the refrigerant flow.

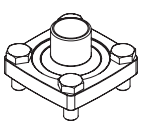

ICM 25-A or B

**Please note:**

 At about 10% of maximum mass flow of ICFE 25, the pressure differential correspond to about 0.07 Bar (1 psi). ICFE 25 will start to open at these conditions.

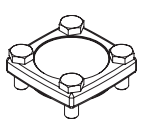

At a pressure differential of minimum 0.2 Bar (2.9 psi) ICFE 25 will be 100 % open.

**ICFW 25**  
*Welding module, 25 DIN or 25 (1") SOC*  
 This module is used for drain connection during hot-gas defrosting - in case of high capacity.

ICFW 25

**ICFB 25**  
*Blank top cover*  
 This provides a blanking cover for unused module ports.

### Code number selection

To determine the correct ICF valve station follow steps 1 through 5.

#### Step 1 Determine application and function requirements:

- Line: Pumped liquid, Liquid Injection, Hot gas defrost, Liquid DX etc.
- Control: On/off solenoid valve, motorised valve
- Defrost: Electric or hot gas

From the above determine the application reference number (see pages 20 and 21):

#### Step 2 Selection criteria - (Please use ICF calculation software)

Download the software from:

<http://www.danfoss.com/BusinessAreas/RefrigerationAndAirConditioning/IR+Software+Overview/IRSoftware.htm>

- Refrigerant
- Capacity
- Temperature
- Circulation rate

From the above determine the valve station required, e.g.: ICF 20 complete with ICM 20-C

#### Step 3 Establish connection sizes and type

- DIN butt-weld, ANSI butt-weld or SOC weld
- 15 (½"), 20 (¾ in.), 25 (1 in.), 32 (1 ¼ in.) or 40 (1 ½ in.)

#### Step 4 Establish code number

(see pages 21 to 27)

### Applications

To facilitate selection of the right ICF valve station Danfoss has predefined and grouped a large number of code numbers matching common applications:

Application #	Sequence of functions						
<b>Liquid feed</b>							
1	Liquid feed (No hotgas defrost)	Stop	Filter	Solenoid	Man Open	Regul.	Stop
2	Liquid feed	Stop	Filter	Solenoid	Man Open	Regul.	Stop/Check
3	Liquid feed	Stop	Filter	Solenoid	Check	Regul.	Stop
10	Liquid feed (No hotgas defrost)	Stop	Filter	Solenoid	Regul.		
15	Liquid feed w. external Conn.	Stop	Filter	Solenoid	Check	Welding	Regul.

For specific identification of the different codes and flow capacity ( $K_v$ ) please refer to ordering section.

*Example of application:*  
*Liquid feed line*

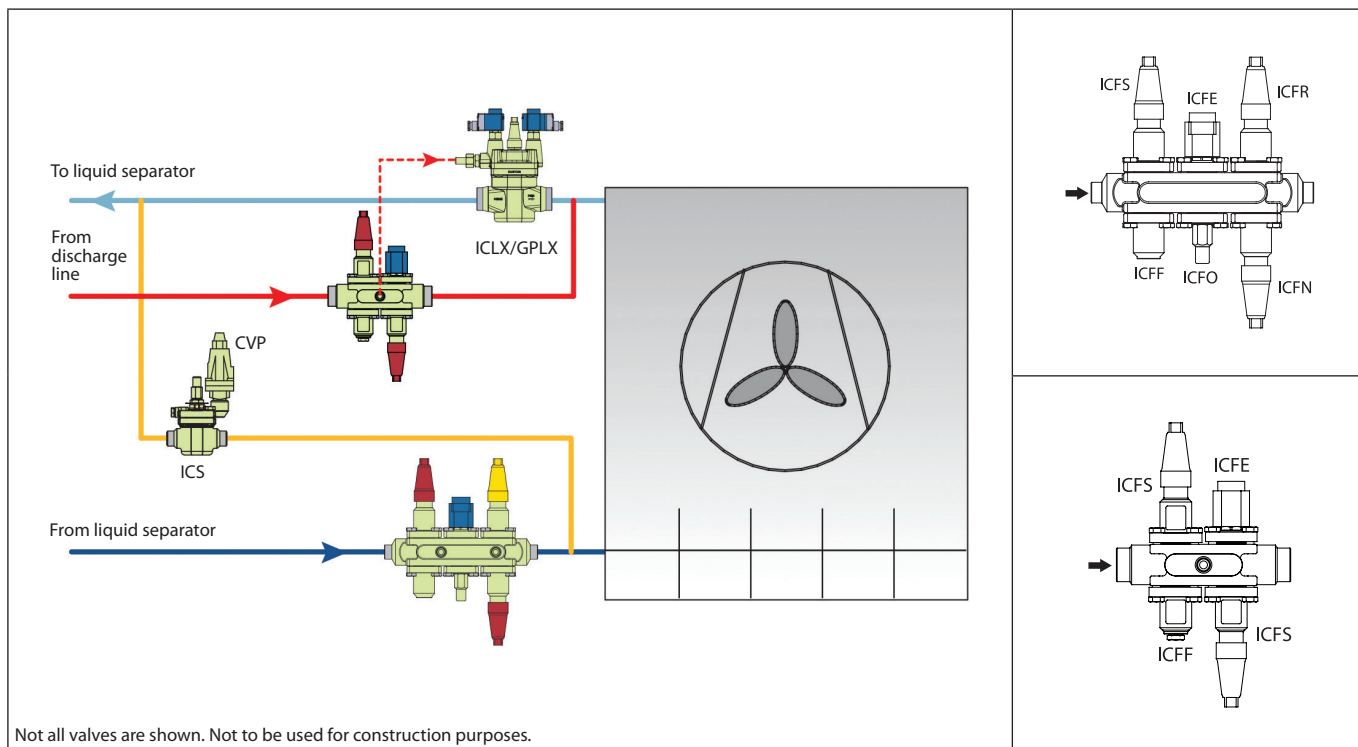

A valve combination for a flooded evaporator operating on/off from a thermostat and with electric defrost is required. Manual override of the solenoid valve is requested. Common ICF configurations for this kind of application is shown here:

## Valve station, ICF

*Example of application:*  
Liquid feed line/  
Hot gas defrost line

Evaporator with soft opening gas powered valve ICLX in the suction line and hot gas defrost featuring: ICF liquid feed station and ICF Hot gas station with side port to power ICLX. ICS+CVP as a defrost regulator (OFV optional depending on capacity).

*Example of application:*  
Liquid injection line

A valve combination for liquid injection to separator with electronic injection valve is required. It is requested to have a solenoid valve in front of the control valve.

### Ordering ICF valve station

Below Nomenclature show the generic configuration and application by identification of housing size, type and application group.

This designation is often used for discussion on possible solutions and will be the final identification on the valve label (see label example)

For ordering, connection size and type must be chosen to get the final identification. **The final identification is done by code number only** (see next pages)

Label example:

ICAD and coils are not included and must be ordered separately.

**Please Note:**

When used in systems with CO<sub>2</sub>, the o-rings on the ICM module can swell (grow). At service, it is therefore recommended to install new o-rings, before the ICM function module is re-installed in the ICF valve body. ICAD and coils are not included and must be ordered separately.

\* Fixed module

ICAD and coils are not included and must be ordered separately.

**Please Note:**

When used in systems with CO<sub>2</sub>, the o-rings on the ICM module can swell (grow). At service, it is therefore recommended to install new o-rings, before the ICM function module is re-installed in the ICF valve body. ICAD and coils are not included and must be ordered separately.

ICAD and coils are not included and must be ordered separately.

**Please Note:**

When used in systems with CO<sub>2</sub>, the o-rings on the ICM module can swell (grow). At service, it is therefore recommended to install new o-rings, before the ICM function module is re-installed in the ICF valve body. ICAD and coils are not included and must be ordered separately.

\* Fixed module

ICAD and coils are not included and must be ordered separately.

**Please Note:**

When used in systems with CO<sub>2</sub>, the o-rings on the ICM module can swell (grow). At service, it is therefore recommended to install new o-rings, before the ICM function module is re-installed in the ICF valve body. ICAD and coils are not included and must be ordered separately.

**Note!**

For special applications that cannot be covered by our predefined ICF code numbers a solution might be to consult DIRcalc ICF or your local Danfoss Sales company. Download DIRcalc ICF from <http://www.danfoss.com/BusinessAreas/RefrigerationAndAirConditioning/IR+Software+Overview/IRSoftware.htm> Prior to designing „non standard“ configurations there are some basic restrictions to the location of the function modules that must be followed (see next page)

ICAD and coils are not included and must be ordered separately.

**Please Note:**

When used in systems with CO<sub>2</sub>, the o-rings on the ICM module can swell (grow). At service, it is therefore recommended to install new o-rings, before the ICM function module is re-installed in the ICF valve body. ICAD and coils are not included and must be ordered separately.
